GitHub • LinkedIn • Portfolio website

Software engineer building full-stack web apps and AI tooling. SWE intern at Nokia, AI/ML trainee at Bitdefender, 1st place at iTEC 2026, and multiple national informatics olympiad medals.

WORK EXPERIENCE

Web Software Engineer Intern — Nokia Networks SRL

02/03/2026 – Current

- Developed and maintained robust backend services using Python, ensuring high-performance and clean data processing.
- Implemented optimal and interactive data visualization suites in Power BI, translating complex system metrics into actionable business intelligence reports for stakeholders.
- Optimized relational database performance across MySQL and MariaDB environments, implementing schema improvements and efficient query logic.
- Streamlined the software delivery lifecycle by configuring Jenkins automation pipelines, reducing manual deployment time and increasing development velocity.

AI & Machine Learning Trainee — Bitdefender

04/2026 – 06/2026

Intensive AI/ML program held by Bitdefender in collaboration with LigaAC Labs: Data Science (NumPy, Pandas, Matplotlib), Classical ML (Random Forests, KNN), Deep Learning (CNNs, Keras, TensorFlow).

- Capstone — InterroAI:** built a local desktop multi-agent platform (React, Electron, FastAPI, ChromaDB) with RAG-based semantic file indexing and offline intent classification (TF-IDF + Logistic Regression).
- Built a self-correcting “Plan → Code → Verify” agent loop with sandboxed pytest execution and autonomous error correction.

Full-Stack Developer & DevOps (Freelance) — Rus S Anca PFA

12/2025 – 02/2026

- Built a full-stack e-commerce platform: React storefront and admin dashboard, Node.js/JavaScript backend, Drizzle ORM, Neon PostgreSQL, Cloudflare R2 media delivery.
- Added RBAC, JWT auth, and Zod validation; handled order-service race conditions to keep inventory accurate under concurrent load.
- Integrated Stripe and pay-on-delivery; deployed with Docker + Railway behind Cloudflare CDN.

Full-Stack Developer (Freelance) — Masco-Baits S.R.L.

05/2025 – 08/2025

- Engineered a production-ready, SEO-optimized e-commerce platform using React, Node.js (Express), and MySQL with a normalized schema handling high-relational data (product hierarchies, reviews, and multi-state orders).
- Developed a secure, server-side RBAC (Role-Based Access Control) architecture for administrative dashboards, automating live stock tracking, content management, and complex order-fulfillment workflows.
- Implemented automated transactional email pipelines, strict GDPR-compliant data-handling practices, and a multi-channel checkout flow (Cash on Delivery and automated IBAN bank transfers).

PROJECTS

iTECify — Lead Developer (iTEC 2026 Web Track — 1st Place)

- Built a high-concurrency monorepo (Bun Workspaces, Turborepo) with a React 19 frontend and a Hono/Drizzle backend.
- Real-time collaborative coding (Y-Monaco + xterm.js over WebSockets) with Docker-sandboxed execution (2 GB RAM, 3 s timeouts) and regex static analysis.
- LLM tool-calling architecture with an Accept/Reject diff overlay and one-click deploys via Vercel API.

TaskLink — Lead Full-Stack Developer (MERN)

- REST API (Node.js/Express) with JWT auth and MongoDB aggregation pipelines; live on Railway.
- Real-time chat and system-wide alerts over WebSockets; responsive React dual-portal dashboard.
- Used Google Cloud Natural Language API to analyze skill sets and optimize user profiles.

SKILLS

Languages JavaScript / TypeScript, Python, Java, C, SQL

Frontend React, Tailwind CSS, HTML / CSS

Backend Node.js, Express, Hono, FastAPI, Spring

Data PostgreSQL, MySQL, MongoDB, ChromaDB, Drizzle ORM

DevOps Docker, Git, Linux, Railway, Render, Cloudflare, CI/CD (Jenkins)

EDUCATION

Politehnica University Timișoara

B.Sc. Computer Engineering (Automatică și Calculatoare)

09/2025 – Current

National College “Preparandia – D. Țichindeal”, Arad

High School Diploma

2021 – 2025

Languages Romanian — native • English — professional working proficiency

HONOURS & AWARDS

- 1st place** — iTEC Timișoara Hackathon, Web Development (2026)
- Bronze Medal** — National Olympiad in Digital Innovation & Creation, Web Dev — 10th place nationally (2025)
- National Informatics Olympiad — 55th place / 100 (2025)
- First Prize** — County Informatics Olympiad (2025)
- Bronze Medal** — National IT Olympiad, TIC Section (2023)
