Software engineer building full-stack web apps and AI tooling. SWE intern at Nokia, AI/ML trainee at Bitdefender, 1st place at iTEC 2026, and multiple national informatics olympiad medals.

WORK EXPERIENCE

Web Software Engineer Intern (Part-time) — Nokia Networks SRL
03/2026 – Current

- Developed and maintained backend services in Python for data processing.
- Built data visualization dashboards in Power BI to report system metrics to stakeholders.
- Improved database performance across MySQL and MariaDB through schema and query changes.
- Configured Jenkins pipelines to automate the deployment process.

Full-Stack Developer (Freelance) — Parohia Ortodoxă Română Sântana I
07/2026

- Shipped a parish website with a custom CMS as three decoupled Dockerized services — React (Vite, Tailwind CSS), FastAPI content API, Python calendar scraper — hosted on Railway with managed MongoDB and Redis over private networking.
- Built a Redis-first read path with MongoDB fallback and write-through saves; secured the admin dashboard with httpOnly-cookie JWT auth (bcrypt), Redis-backed per-IP rate limiting, and async gallery uploads to Cloudflare R2.

AI & Machine Learning Trainee (Training Program) — Bitdefender
04/2026 – 06/2026

Intensive AI/ML program held by Bitdefender in collaboration with LigaAC Labs: Data Science (NumPy, Pandas, Matplotlib), Classical ML (Random Forests, KNN), Deep Learning (CNNs, TensorFlow).

- **Capstone — InterroAI**: Architected a hybrid desktop–cloud coding agent (Electron, React, FastAPI) with a strictly decoupled runtime, separating local disk operations (sandboxed editing, testing, git) from cloud-hosted services (LLM gateway, authentication, and indexing).
- Built an asynchronous, privacy-preserving indexing pipeline (Azure Blob Storage, Service Bus, PostgreSQL/pgvector with RLS) that indexes code without storing raw source files, coupled with a self-correcting "Plan Code Verify" agent loop that auto-fixes errors using pytest and ruff.

Full-Stack Developer & DevOps (Freelance) — Rus S Anca PFA
12/2025 – 02/2026

- Built a full-stack e-commerce platform: React storefront and admin dashboard, Node.js/JavaScript backend, Drizzle ORM, Neon PostgreSQL, Cloudflare R2 media delivery.
- Added RBAC, JWT auth, and Zod validation; handled order-service race conditions to keep inventory accurate under concurrent load.
- Integrated Stripe and pay-on-delivery; deployed with Docker and Railway behind Cloudflare CDN.

Full-Stack Developer (Freelance) — Masco-Baits S.R.L.
05/2025 – 08/2025

- Built an SEO-optimized e-commerce platform using React, Node.js (Express), and MySQL with a normalized schema for product hierarchies, reviews, and multi-state orders.
- Developed server-side RBAC for administrative dashboards, covering stock tracking, content management, and order-fulfillment workflows.
- Implemented automated transactional email pipelines, GDPR-compliant data handling, and a multi-channel checkout flow (cash on delivery and IBAN bank transfers).

PROJECTS

iTECify — Developer (iTEC 2026 Web Track — 1st Place)

- Built a monorepo (Bun Workspaces, Turborepo) with a React 19 frontend and a Hono/Drizzle backend.
- Real-time collaborative coding (Y-Monaco + xterm.js over WebSockets) with Docker-sandboxed execution and regex static analysis.
- LLM tool-calling architecture with an Accept/Reject diff overlay and one-click deploys via Vercel API.

TaskLink — Full-Stack Developer (MERN)

- REST API (Node.js/Express) with JWT auth and MongoDB aggregation pipelines; live on Railway.
- Real-time chat and system-wide alerts over WebSockets; React dual-portal dashboard.
- Used Google Cloud Natural Language API to analyze skill sets and build user profiles.

SKILLS

Languages JavaScript / TypeScript, Python, Java, C, SQL
Frontend React, Tailwind CSS, HTML / CSS
Backend Node.js, Express, Hono, FastAPI, Spring
Data PostgreSQL, MySQL, MariaDB, MongoDB, ChromaDB
DevOps Docker, Git, Linux, AWS, Railway, Cloudflare, CI/CD (Jenkins)

EDUCATION

Politehnica University Timişoara
B.Sc. Computer Engineering (Automatică şi Calculatoare)
09/2025 – Current

National College "Preparandia – D. Țichindeal", Arad
High School Diploma
2021 – 2025

Languages Romanian — native • English — professional working proficiency

HONOURS & AWARDS

- **1st place** — iTEC Timişoara Hackathon, Web Development (2026)
- **Bronze Medal** — National Olympiad in Digital Innovation & Creation, Web Dev — 10th place nationally (2025)
- National Informatics Olympiad — 55th place / 100 (2025)
- **First Prize** — County Informatics Olympiad (2025)
- **Second Prize** — County Informatics Olympiad (2024)
- **Bronze Medal** — National IT Olympiad, TIC Section (2023)
